## **Abstract**

The recent international events had a large impact on the aviation sector because of several reasons. This documentation is all about the user interface wireframe, here the home page of our flight fare prediction project is explained with proper input.

## 1. Web Interface

- Our web page is an interface where input is taken from the user and the prediction is displayed.

The screenshot displays a web interface for flight booking. It features six input fields arranged in a 3x2 grid, each with a label and a placeholder. The first row contains 'Departure Date' and 'Arrival Date' with date pickers. The second row contains 'Source' and 'Destination' with dropdown menus. The third row contains 'Stoppage' and 'Which Airline you want to travel?' with dropdown menus. Below the input fields is a 'Submit' button. At the bottom, the text 'Your Flight price is Rs. 6777.52' is displayed.

Field	Value
Departure Date	dd-mm-yyyy --:-- --
Arrival Date	dd-mm-yyyy --:-- --
Source	Delhi
Destination	Cochin
Stoppage	Non-Stop
Which Airline you want to travel?	Jet Airways

Submit

Your Flight price is Rs. 6777.52

This is a duplicate of the first screenshot, showing the same flight booking web interface. It features six input fields arranged in a 3x2 grid, each with a label and a placeholder. The first row contains 'Departure Date' and 'Arrival Date' with date pickers. The second row contains 'Source' and 'Destination' with dropdown menus. The third row contains 'Stoppage' and 'Which Airline you want to travel?' with dropdown menus. Below the input fields is a 'Submit' button. At the bottom, the text 'Your Flight price is Rs. 6777.52' is displayed.

Field	Value
Departure Date	dd-mm-yyyy --:-- --
Arrival Date	dd-mm-yyyy --:-- --
Source	Delhi
Destination	Cochin
Stoppage	Non-Stop
Which Airline you want to travel?	Jet Airways

Submit

Your Flight price is Rs. 6777.52

## 2. User Input

- Whenever the user hits our url, they first see the user input page here they have to provide the information like:
  - Every user input has its own dropdown where the user can select their input.
  - After providing the required input and pressing the submit button, the page refreshes and displays the output

## 3. Result Page

After the user hits the submit button the page gets refreshed and the results are being displayed in the highlighted area in the above frame. The user can refill all the inputs in the same page and get the results in the same way.
